PRODUCT DATA SHEET
SikaCor® PUR-1

1-PACK MOISTURE-CURING POLYURETHANE BASED INTERMEDIATE COAT

DESCRIPTION
SikaCor® PUR-1 is a moisture-curing 1-pack coating material based on polyurethane. SikaCor® PUR-1 is filled with micaceous iron oxide and is used e.g. as intermediate or travel coat. SikaCor® PUR-1 can be overcoated with the 2-pack PUR-topcoats SikaCor® EG-4 and SikaCor® EG-5. Low solvent content referring to Protective Coatings Directive of German Paint Industry Association (VdL-RL 04).

USES
SikaCor® PUR-1 may only be used by experienced professionals. Corrosion protection for steel structures and galvanized steel in aggressive atmosphere, e.g. marine and industrial climate.

CHARACTERISTICS / ADVANTAGES
- Fast curing
- Early exposure to water
- Tough-hard, robust
- Applicable even under difficult application conditions, for example at low temperatures and/or high air humidity
- Very good corrosion protection

APPROVALS / CERTIFICATES
- Approved according to German Standard 'TL/TP-KOR-Stahlbauten', page 89.

SikaCor® PUR-1
September 2018, Version 01.01
020601000030000003
TECHNICAL INFORMATION

Chemical Resistance
Industrial and marine atmosphere, water, sewage, sea water, oil, grease, drew salts.

Thermal Resistance
Dry heat up to + 150°C, short term up to max. + 180°C
Damp heat up to + 60°C

SYSTEM INFORMATION

System
Steel:
1 x SikaCor® Zinc PUR
1 - 2 x SikaCor® PUR-1
1 x SikaCor® EG-4 or SikaCor® EG-5

Hot dip galvanized steel:
1 x SikaCor® PUR-1
1 x SikaCor® EG-4 or SikaCor® EG-5

When applying SikaCor® EG-5 in light colour shades a 2nd top coat may become necessary in order to achieve a perfect opacity.

APPLICATION INFORMATION

Thinner
Sika® Thinner S
If necessary max. 5 % Sika® Thinner S may be added to adapt the viscosity.

Consumption
Theoretical material-consumption/VOC without loss for medium dry film thickness:

<table>
<thead>
<tr>
<th>Dry film thickness</th>
<th>80 µm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wet film thickness</td>
<td>140 µm</td>
</tr>
<tr>
<td>Consumption</td>
<td>~0.220 kg/m²</td>
</tr>
<tr>
<td>VOC</td>
<td>~48.6 g/m²</td>
</tr>
</tbody>
</table>

Apart from small areas the dry film thickness of 180 µm of SikaCor® PUR-1 should not be exceeded per application.

Product Temperature
Min. + 5°C

Relative Air Humidity
Min. 30 %, max. 98 %, surface temperature shall be at least 3 K above dew point.
The surface must be dry and free from ice.

Surface Temperature
Min. 0°C

Waiting Time / Overcoating
Between primer coat and intermediate coat (at + 20°C):

<table>
<thead>
<tr>
<th>Min.</th>
<th>4 h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max.</td>
<td>3 months</td>
</tr>
</tbody>
</table>

In case of longer waiting times please contact Sika.

Drying time
Final drying time
Depending on layer thickness and temperature final hardness is achieved within several days.

APPLICATION INSTRUCTIONS

SUBSTRATE PREPARATION

Steel:
Blast cleaning to Sa 2 ½ according to ISO 12944-4.
Free from dirt, oil and grease.

Hot dip galvanized steel, stainless steel and aluminium:
Free from dirt, oil, grease and corrosion products.
In case of permanent immersion and condensation the surfaces must be slightly sweep blasted with a ferrite-free blasting abrasive.

For contaminated and weathered surface e.g. galvanized and primed areas we recommend to clean with SikaCor® Wash.
MIXING

All materials are supplied ready for use; stir thoroughly prior to application.

Attention, risk of injuries! Container may be under pressure. Lid may come off unexpectedly. Prior to opening reduce pressure, e.g. by piercing the lid.

APPLICATION

The method of application has a major effect on achieving uniform thickness and appearance. Spray application will give the best results. The indicated dry film thickness is easily achieved by airless spray. Adding solvents reduces the sag resistance and the dry film thickness. In case of application by roller or brush, additional applications may become necessary to achieve the required coating thickness, depending on type of construction, site conditions, colour shade etc. Prior to major coating operations a test application on site may be useful to ensure the selected application method will provide the requested results.

By brush and roller

Conventional high pressure spraying:
• Nozzle size 1.5 - 2.5 mm
• Pressure 3 - 5 bar

Airless-spraying:
• Pressure min. 180 bar
• Nozzle size 0.38 - 0.53 mm (0.015 - 0.021 inch)
• Spraying angle 40° - 80°

CLEANING OF EQUIPMENT

Sika® Thinner S

BASIS OF PRODUCT DATA

All technical data stated in this Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for the exact product data and uses.

ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data. Further notes and information data sheets on product safety and disposal can be found on the Internet at www.sika.de.

VOC DATA

According to the EU Directive 2004/42/CE, the maximum allowed content of VOC (product category IIA / i type Sb) is 500 g/l (Limits 2010) for the ready to use product.

The maximum content of SikaCor® PUR-1 is < 500 g/l VOC for the ready to use product.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika’s current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika’s recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product’s suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
