8.2 Exposure controls

**Personal protective equipment**

**Eye protection**
- Safety glasses with side-shields conforming to EN166
- Eye wash bottle with pure water

**Hand protection**
- Chemical-resistant, impervious gloves complying with an approved standard must be worn at all times when handling chemical products. Reference number EN 374. Follow manufacturer specifications.
  - Suitable for short time use or protection against splashes:
    - Butyl rubber/nitrile rubber gloves (0.4 mm)
    - Contaminated gloves should be removed.
  - Suitable for permanent exposure:
    - Viton gloves (0.4 mm), breakthrough time >30 min.

**Skin and body protection**
- Protective clothing (e.g. Safety shoes acc. to EN ISO 20345, long-sleeved working clothing, long trousers). Rubber aprons and protective boots are additionally recommended for mixing and stirring work.

**Respiratory protection**
- In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
  - Organic vapor (Type A) and particulate filter
    - A1: < 1000 ppm; A2: < 5000 ppm; A3: < 10000 ppm
    - P1: Inert material; P2, P3: hazardous substances
- Ensure adequate ventilation. This can be achieved by local exhaust extraction or by general ventilation. (EN 689 - Methods for determining inhalation exposure). This applies in particular to the mixing / stirring area. In case this is not sufficient to keep the concentrations under the occupational exposure limits then respiration protection measures must be used.

**Environmental exposure controls**

**General advice**
- Do not flush into surface water or sanitary sewer system.
- If the product contaminates rivers and lakes or drains inform respective authorities.
