Sika® FloorJoint PB-30 PDRS

PREFABRICATED POLYMER COMPOSITE FLOOR JOINT PANEL FOR CAR PARKS WITH CONCENTRIC INCORPORATED RUBBER SEAL

BESCHREIBUNG

Sika® FloorJoint PB-30 PDRS is a prefabricated, carbon fibre reinforced polymer (CFRP) composite floor panel system with high mechanical resistance. Its concentric incorporated rubber seal allows low vibrations under direct car traffic. The rubber seal is exchangeable. Sika® FloorJoint PB-30 PDRS is suitable for vertical and horizontal movements of the concrete slab. The profile is equipped with a recessed flange along both sides, used to blend in with new floor coverings for a smooth transition.

ANWENDUNG

Sika® FloorJoint PB-30 PDRS ist nur für die Anwendung durch gewerbliche Verarbeiter bestimmt.

Floor joint panel for new build and refurbishment of joints for concrete / concrete screeds with normal up to medium wear e.g. for inner and outer zones of car park decks, garage floors and ramps.

VERARBEITUNGSAWEISUNG

UNTERGRUNDQUALITÄT / VORBEREITUNG

The concrete substrate must be sound and of sufficient compressive strength (minimum 25 N/mm²) with a minimum pull off strength of 1.5 N/mm². The substrate must be clean, dry and free of all contaminants such as dirt, oil, grease. Weak concrete must be removed and surface defects such as blowholes and voids must be fully exposed. If there are built-in metal profiles, remove them using an angle grinder or cutting torch, being careful not to produce sparks, which might be fire hazard. All dust, loose and friable material must be completely removed from all surfaces before installation of the floor joint panel, preferably by brush and vacuum. For the detailed description how to prepare the cutout, please refer to the Method Statement of Sika® Floor-Joint PDRS.

VERARBEITUNG

Please refer to the Method Statement of Sika® Floor-Joint PDRS.

WEITERE HINWEISE

- The Product shall only be applied in accordance with its intended use.
- For outdoor use only if the traffic speed is limited to <30 km/h (<19 mph), and if the polymer panel is coated with an UV protection e.g. with Sikafloor®-359 N.
- Always store Sika® FloorJoint PDRS panels in horizontal position
- Settlement of the substrate or of the adhesive can result in cracks in Sika® FloorJoint PB-30 PDRS. These cracks do not constitute a defect, since they don't affect the viability and suitability for use.
- Don't exceed the maximum grinding depth of 2 mm. If the maximum grinding depth of 2 mm has been exceeded and the mechanical resistance of the profile is reduced. Replace the panel if the maximum grinding depth has been exceeded.
- Periodically inspect the rubber seal and renew if necessary.
- Continuously monitor the abrasion of the diamond cutting disk used for preparing the cut-out. Regularly

readjust the disk to ensure all cuts are prepared with a constant depth of 25 mm.

- Do not use a hammer for placing and adjusting the floor panel during installation.
- Always refer to the manufacturer's instructions before using tools and mixing equipment.
